Even though this game is already very cheap, I can only really recomend this game when it's on sale. All the levels are very short, the difficulty is inconsistent, and the controls are lacking, which can make certain puzzles more frustrating than they

should have been. it's only a 4/10 at best,. so only grab if the genre appeals to you.. Beat game in under an hour. The gameplay took a second to figure out the details of the mechanic, 1st two bosses drag out a bit longer than they need to. Last boss was tougher. Pleasant little indie game.. I beat this game in a little over an hour, so let me tell you what it's about. Take Celeste, remove some of the polish, and design the levels like you're making an IWBGTG fangame (meaning: tedious, repetitive and with an overabundance of deadly obstacles), and you have this game. Granted, I'm a bit of a sucker for needle games, so long as they aren't too egregious. Not another Needle Game, Kill the Guy and Kamilia 3 are some of my favorites from the genre. But even in that regard, this game falls short on the difficulty curve and leans a little too hard on the tedium. It's only \$2, and the value you get is pretty decent, so I do recommend it, but you should know what you're getting into. Basically, if you can't get past the first world of Solgryn's I Wanna Be the Boshy on "Totally Average" mode, you'll probably want to pass on this.. I beat this game in a little over an hour, so let me tell you what it's about. All the levels are very short, the difficulty is inconsistent, and the controls are lacking, which can make certain puzzles more frustrating than they should have been. it's only a 4/10 at best,. so only grab if the genre appeals to you.. Short and Sweet platformer. Played it sparingly in a day and completed it. Overall the only thing I didn't liked was the fact that there was only one music track for the most part, but even then you don't grow tired of it. If you like platformers and need to scratch that itch, go for it.. 222 Hearts is really hard, because you have to aim nearly pixel perfect to avoid crashing into spikes. It got really annoying to replay some levels over 30 times just because of the accuracy. Not recommended for casual playing, but recommended for speedrunners.
